

Sinda Khenine

Senior AI, Data & Business Intelligence Engineer

Founder of SKatalyst AI · ML Conference Speaker

founder@skatalystai.com sindakhenine.com skatalystai.com

LinkedIn · Sinda Khenine X · @SKatalystAI

Senior AI, data and business intelligence engineer with experience since 2017 across industrial analytics, machine learning and enterprise data platforms. Founder of SKatalyst AI, focused on AI orchestration, context engineering and building agent-based systems. Hands-on practice combines experiments in agent autonomy with software development using frontier AI coding agents.

AI ENGINEERING PRACTICE

Build and experiment with agent workflows, tool contracts and persistent context. Use frontier AI coding agents to implement and iterate on software, with architecture, code review, testing and validation guiding the work.

PROFESSIONAL EXPERIENCE

Senior Big Data & BI Engineer

Electrolux Germany · Sep 2020 to Present

- Develop enterprise analytics and business intelligence capabilities for industrial decision support.
- Build and maintain large-scale data processing and governed analytical workflows.
- Apply predictive modeling to forecasting, optimization, and pattern discovery.
- Contribute to AI automation and structured technical reporting.

Big Data Analyst

Electrolux Germany · Sep 2019 to Aug 2020

- Developed dashboards for consumer feedback and product-performance analysis.
- Processed heterogeneous datasets for business intelligence and reporting.
- Supported predictive modeling and data-driven decision support.

Data Scientist

DomElec, Tunisia · Feb 2017 to Jul 2019

- Developed forecasting and predictive models for operational planning.
- Applied statistical and machine-learning methods to engineering and business questions.
- Integrated heterogeneous sources for analytics and decision support.

SELECTED EXPERTISE

AI orchestration and agent systems	Context engineering and RAG
MCP and bounded tool use	Agent evaluation and observability
Frontier AI coding agents	Enterprise data architecture
Apache Spark and data pipelines	Business intelligence and analytics
Machine learning and forecasting	Document understanding and validation

EDUCATION

Engineering Degree, Big Data & Business Intelligence

Ecole Polytechnique Internationale

2018 to 2020

Engineering Studies, Computer Science

ESPRIT

2017 to 2018

SELECTED AI PROJECTS

SKatalyst AI
Founder, AI architecture and engineering. Build an agentic platform that turns fragmented organizational data into structured context, dashboards, RAG chat and customer-owned applications. Human approval gates and data-derived validation govern generation. Private Beta; local upload and Docker export are the approved path.

One-Person AI Company
Designed and ran a 24-hour orchestration experiment with an AI manager, research agent and PostgreSQL event log. Built validated decision contracts, claim verification and a live control room. Produced a final synthesis at T+24h with three human interventions. Local experiment.

Grok Arena
Designed a multi-agent environment with ten agent roles and 30 role-scoped MCP tools. Built a deterministic engine, per-agent authorization and an orchestrator with persistent sessions. A seven-agent run executed the council chain; a full external-agent match remains unproven. Local experiment.

Context Engineering & Document Understanding
Research and conference practice on retrieval, source quality, permissions, provenance and evaluation, alongside modular OCR, extraction validation and human review.

SPEAKING

UPCOMING
