Sinda Khenine

Senior AI & Data Science Engineer | Industrial PhD Candidate
Germany

Email: sinda.khenine555@gmail.com
LinkedIn: http://linkedin.com/in/sinda-khenine-67545614b/

Profile

Senior AI and Data Science Engineer with over **8 years of experience** in industrial analytics, machine learning, and AI-driven decision systems. Currently working at **Electrolux** on large-scale data platforms, predictive modeling, and **AI-based automation for R&D and product intelligence**. Strong background in applied AI, Big Data systems, and end-to-end analytical workflows. Seeking an **industrial PhD** focused on **reliable, verifiable, and agent-based AI systems** in cooperation with academia.

Professional Experience

Electrolux Group – Germany

Senior Big Data & Business Intelligence Engineer
September 2020 – Present

- Designed and implemented **AI-driven analytics and decision-support systems** for product performance, customer experience, and market intelligence.
- Developed **machine-learning-based models** for forecasting, optimization, and pattern discovery in large-scale industrial datasets.
- Supported **strategic R&D and product development decisions** through advanced analytical frameworks.
- Led development of **cross-analysis tools and data pipelines** to identify product improvement and optimization potential.
- Actively involved in **AI automation initiatives** and advanced analytics platforms in an industrial environment.

Electrolux Group – Germany

Big Data Analyst (Contract)
September 2019 – August 2020

- Developed dashboards for **consumer feedback analysis**, improving product performance evaluation.
- Processed complex datasets using **machine learning techniques**.
- Supported adaptive user interfaces and predictive modeling solutions.

DomElec – Tunisia

Data Scientist
February 2017 – July 2019

- Developed and implemented **forecasting and predictive models** to improve productivity and KPIs.
- Applied **statistical and machine learning methods** to engineering and business problems.
- Integrated heterogeneous data sources for analytics and decision-making.

Education

Ecole Polytechnique Internationale

Engineering Degree (Dipl.-Ing. equivalent) – Big Data & Business Intelligence
2018 – 2020
Grade: **Very Good**

Focus areas:

- Artificial Intelligence
- Machine Learning & Deep Learning
- Data Mining & Text Mining
- Big Data Analytics

ESPRIT – Ecole Supérieure Privée d'Ingénierie et de Technologies

Engineering Degree – Computer Science
2017 – 2018

Focus areas:

- Computer Science
- Mathematics
- Software Engineering

Technical Skills

- **Artificial Intelligence & Machine Learning**, including **Large Language Models (LLMs)**
- Data Science & Predictive Analytics
- Big Data Systems (Apache Spark)
- Neural Networks & AI-based Automation Systems
- Analytics & Data Visualization
